

Tie Crane

RCE

These hard workers won't work their tails off.

Don't get us wrong. With outstanding lift capacity, swing torque and draw-bar pull these machines are highly productive. But with their tight tail swing, operators can concentrate on the work in front of them without worrying about damaging the

machines or rail cars passing behind them—productivity in confined areas soars. Control is smooth and effortless, with the Powerwise III management system delivering pinpoint metering. Who says you have to work your tail off to be more productive?

Hydraulic driven drive axles with integrated dynamic/failsafe braking standard

Fuel efficient iT4 John Deere powered engines

Reduced tail swing and independent swing boom

Multiple boom arm options:
(1) Tie Crane (2) Bridge Crane

Daily service points are all accessible at ground level

Smooth powerful hydraulics

Specifications	TC-75D	TC-85D	TC-120D	TC-135D
SAE Net Horsepower	54 hp	54 hp	93 hp	93 hp
Lift Capacity	2,124 lb.	2,124 lb.	2,883 lb.	2,992 lb.
Tail Swing	ZTS	ZTS	N/A	RTS
Arm Breakout Force	8,554 lb.	8,554 lb.	12,823 lb.	12,942 lb.

 Material Cart

1. Hydraulic powered magnet for pickup of scrap material i

2. Carts with setup to front and rear of equipment to maximize tie distribution efficiency

3. Service carts designed to handle all types of material, from heavy loads of reclaimed scrap to ties

Large fuel tanks and 500- and 5,000-hour engine and hydraulic oil-service intervals help increase uptime and lower daily operating costs

Remote fillers make fluid servicing fast and easy

Large, easy-to-open doors provide quick access to service items. Lube banks, filters and checkpoints are grouped for added convenience

Machine Information Center (MIC) captures and stores vital machine performance and utilization data to help improve uptime, productivity and profit

Using the easy-to-navigate LCD color monitor, you can easily keep tabs on up to 14 maintenance intervals and 32 machine operating parameters

We're open-minded when it comes to simplifying service

We're always open to ideas to make our excavators simpler to service and lower cost to maintain. Like large, easy-to-open service doors that provide ample access to conveniently grouped service points. And extended service intervals

and remote-mounted vertical oil and fuel filters that speed periodic maintenance. So you can spend less time on machine upkeep, and more time doing the real work of increasing your bottom line.
